PROFESSIONAL SUMMARY

Senior Backend Developer with over 8 years of experience in designing, developing, and scaling robust server-side applications and distributed systems. Expert in Java, Go, and Python, with a proven track record of optimizing system performance by up to 40% and migrating monolithic architectures to microservices. Deep expertise in cloud infrastructure (AWS/GCP), CI/CD pipelines, and database optimization. Committed to writing clean, maintainable code and mentoring cross-functional teams to deliver high-quality software solutions.

CORE COMPETENCIES

- **Languages:** Java (Spring Boot), Go, Python (Django/FastAPI), Node.js, SQL, Bash.
- **Backend Technologies:** Microservices Architecture, RESTful APIs, gRPC, GraphQL, Message Queues (Kafka, RabbitMQ).
- **Cloud & DevOps:** AWS (EC2, Lambda, S3, RDS), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions.
- **Databases:** PostgreSQL, MongoDB, Redis, Cassandra, Elasticsearch.
- **Tools & Methodologies:** Git, Agile/Scrum, Test-Driven Development (TDD), System Design, OAuth2/JWT.

PROFESSIONAL EXPERIENCE

Senior Backend Developer | [Current Company Name] ? [City, State]

Jan 2021 ? Present

- **Architected and led the migration** of a legacy monolithic application to a Golang-based microservices architecture, reducing deployment time by 60% and increasing system scalability to handle 10M+ daily active users.
- **Optimized database performance** by refactoring complex SQL queries and implementing Redis caching strategies, resulting in a 35% reduction in API response latency.
- **Spearheaded the integration** of a real-time data processing pipeline using Apache Kafka, enabling live analytics for the marketing team and increasing user engagement by 15%.
- **Mentored a team of 5 junior and mid-level developers**, conducting weekly code reviews and technical workshops that improved team velocity by 20%.
- **Implemented automated CI/CD pipelines** using Terraform and GitHub Actions, reducing manual deployment errors by 90% and ensuring 99.99% system uptime.

Backend Developer | [Previous Company Name] ? [City, State]

July 2017 ? Dec 2020

- **Developed and maintained scalable RESTful APIs** using Java Spring Boot for a high-traffic e-commerce platform, managing over 500 requests per second.

- **Reduced infrastructure costs by \$50,000 annually** by optimizing AWS resource allocation and transitioning high-frequency tasks to AWS Lambda (Serverless).
- **Designed and implemented a multi-factor authentication (MFA) system** using OAuth2 and JWT, enhancing platform security for 2M+ user accounts.
- **Collaborated with frontend and mobile teams** to define API contracts and documentation using Swagger/OpenAPI, reducing integration bugs by 30%.
- **Improved test coverage from 45% to 85%** by introducing unit and integration testing standards, significantly reducing production hotfixes.

Software Engineer | [Earlier Company Name] ? [City, State]

June 2015 ? June 2017

- **Engineered backend features** for a fintech application using Python and Django, focusing on transaction processing and reporting modules.
- **Built and optimized web scrapers** to aggregate financial data from 20+ external sources, improving data accuracy by 25%.
- **Resolved critical production bottlenecks** by debugging memory leaks and optimizing Python scripts, enhancing application stability during peak hours.

EDUCATION

Bachelor of Science in Computer Science

[University Name], [City, State]

CERTIFICATIONS

- AWS Certified Solutions Architect ? Associate
- Certified Kubernetes Application Developer (CKAD)
- Oracle Certified Professional: Java SE Programmer

TECHNICAL PROJECTS

Distributed Task Scheduler | *Open Source*

- Developed a high-availability task scheduler in Go using Etcd for service discovery and consensus, supporting distributed cron jobs across multiple nodes.

Microservices E-Commerce Blueprint | *GitHub*

- Created a reference architecture using Spring Cloud, Docker, and Kubernetes to demonstrate best practices in circuit breaking, API gateways, and centralized logging.
